

Educational program	6B11301 Organization of transportation, traffic and operation of transport
EP purpose	<p>The purpose of training under the educational program 6B11301 «Organization of transportation, traffic and operation of transport» is to train specialists who are able to organize and coordinate the transportation of various types of cargo and passengers, monitor and ensure the safety of vehicles, as well as effectively manage and operate road transport enterprises and logistics systems.</p> <p>Students studying this program receive theoretical and practical knowledge in the field of transportation organization, legal foundations of transport activities, economics and finance of transport enterprises, technical operation of vehicles, transport logistics, quality management in the transport industry and many other aspects related to transport and logistics.</p> <p>The training includes both theoretical classes and practical work, including practical training at transport industry enterprises.</p> <p>Graduates of the program can work at transport enterprises, logistics companies, cargo and passenger airlines, railway and road transport companies, as well as organize and manage transportation at enterprises of various sectors of the economy</p>
	<p>ON 1 - understand the basic principles of the organization and planning of transportation, including choosing the optimal route, determining the necessary vehicle and calculating the delivery time</p> <p>ON 2 - be able to analyze transportation needs and choose optimal vehicles and routes to solve effective logistics and achieve business goals</p> <p>ON 3 define the structure of the transportation system, the main modes of transport, modes of movement of vehicles, basic concepts and terms in the field of transport and logistics</p> <p>ON 4 - analyze the causes and factors affecting transport problems, such as traffic congestion, lack of necessary infrastructure solutions and inefficiency of management systems</p> <p>ON 5 - describe the specifics of the work of transport enterprises, the processes of transportation of goods and passengers, the principles of the organization of routes and schedules, technical characteristics and rules of operation of vehicles</p> <p>ON 6 - apply laws and regulations governing the organization and planning of transportation, including requirements for safety and environmental sustainability</p> <p>ON 7 - to evaluate the quality of work of transport enterprises, the efficiency of the use of transport resources, the compliance of transport services with the needs of customers and it is important to take into account reliability and safety</p> <p>ON 8 - analyze prospects and possible measures for the development of the transport market and infrastructure, including modernization, improvement of management and coordination between different modes of transport</p> <p>ON 9 - to link professional activities between different modes of transport, to realize the role of transport in the development of the economy and social sphere, the impact of transport on the environment</p> <p>ON 10 - apply the acquired knowledge and skills in practice for planning and organizing specific transport operations and taking into account the peculiarities of various modes of transport</p> <p>ON 11 - to understand the principles and methods of assessing the environmental safety of transport systems and the choice of environmentally productive solutions and the specifics of the operation of various modes of transport</p> <p>ON 12 - to identify shortcomings and problems in the operation of the transport system, incorrect decisions in the organization of transportation and operation of transport, inefficiency of the separation of traffic flows</p>
EP type	Current EP
Level on NQF	6
Level on IQF	6
The awarded academic degree	Bachelor in services for the educational program «6B11301 Organization of transportation, traffic and operation of transport»

Period of study	4
Volume of the credits	240
Name of professional standard	-
Date of approval EP on the Academic Council	10-04-2023
